

 **ANS**[®] Trustees
of Nuclear

Advancing nuclear science and technology for the benefit of humanity

Go far together

The adage “If you want to go fast, go alone; if you want to go far, go together” offers an important message to today’s nuclear community. All of us – utilities, suppliers, researchers, students, policymakers, and the public – need to move forward in unison if we are to realize the full potential of nuclear energy and technology.

The [ANS Trustees of Nuclear](#) program provides a leadership opportunity for corporations to help strengthen ANS, the main professional organization for the nuclear discipline, and invest in impactful programs that improve “nuclear literacy” in our schools, our conversations with policymakers, and our larger public discourse.

Teach our children well

In partnership with the U.S. Department of Energy and Discovery Education, ANS developed a K-12 education initiative that has provided nuclear science curriculum to 1.6 million students and counting.

We are building upon our success with the launch of the ANS K-12 STEM Academy. This dynamic, multifaceted effort will help students across the country explore the many applications of nuclear science and its impact on energy, healthcare, food, and the environment.

Your contribution as a [Trustee of Nuclear](#) will help us educate the next generation and inspire future careers in nuclear.

This is your captain speaking...

During turbulent times, the nuclear community needs a calm, trustworthy presence. As the premiere technical authority on nuclear technology, ANS channels the collective voice of 10,000 scientists and engineers to demystify complex issues and allay public fears.

By becoming a [Trustee of Nuclear](#), you will provide critical support for our rapid-response communications capabilities, as well as our programs to raise public awareness of the benefits of nuclear science and technology – while combatting false or misleading claims in the media or online.

Shape the narrative

An exciting new nuclear age is within our reach, but our ability to grasp it hinges on whether we speak with a credible and authoritative voice.

Through our Nuclear Policy Leadership Events, [Trustees of Nuclear](#) will gain an exclusive opportunity to participate in meaningful policy discussions with key decisionmakers about nuclear technology's role in addressing our nation's fundamental economic and environmental goals.

Keep your workforce in the know

Provide your team with access to all ANS has to offer with complimentary ANS individual memberships as a benefit of your [Trustees of Nuclear](#) membership.

Your employees will stay on top – and ahead – of their field through current and in-depth industry news coverage, professional development and leadership opportunities, free and discounted events, involvement in our Technical Divisions, and much more.

ANS Trustees of Nuclear

Stand out as a leader

Whether visiting the ANS website, attending a national meeting or webinar, or reading Nuclear News magazine, your support will be recognized by the more than 35,000 nuclear professionals and students who are engaged with the Society.

Exclusive, high-profile branding will offer persistent visibility throughout our suite of marketing and communications opportunities to ensure our community knows that you are an [ANS Trustee of Nuclear](#).

Your exclusive members-only monthly news and events bulletin

OCTOBER 2021

Check out the Winter Meeting program!
November 30 - December 3 | Washington, D.C. | In Person or Virtual

The upcoming 2021 ANS Winter Meeting & Technology Expo is less than two months away! Learn about the more than 100 sessions and 300-plus presentations taking place during the meeting.

Register now to join us in person in Washington, D.C. or virtually. In-person attendees will have access to all sessions. Virtual attendees will be able to present papers and livestream all plenary and executive sessions, plus many technical sessions.

Energy Journalism, Nuclear and a Changing Climate and Media Landscape
Wednesday, October 13 | 2:00 - 3:30 pm EDT

Join us for a special ANS members-only webinar this Wednesday! Energy and environmental news make front-page headlines every day as floods, fires, and droughts focus the world's attention on climate change and experts call for a rapid energy transition. In this exclusive members-only webinar, leading energy and environmental reporters will go beyond nuclear to discuss the changing role of energy journalism and the challenges of connecting with the public on complex issues like energy, climate change, and science. Register now.

The Benefits of Trusteeship

[Trustees of Nuclear](#) gain a seat on the newly-formed ANS Leadership Council, and with it an opportunity to shape our public communications, policy engagement, and K-12 Nuclear STEM initiatives.

Join Nuclear Policy Leadership Events where industry leaders engage in frank, “Chatham House Rules” discussions with members of Congress.

By becoming a [Trustees of Nuclear](#) your organization automatically becomes a founding partner of the ANS K-12 STEM Academy, which provides nuclear curriculum, in-class experiences with nuclear experts, and classroom resources reaching classrooms across the country.

Your trusteeship contribution also provides critical support for an expanded ANS Rapid Response Task Force, media-trained and at the ready 24/7 to provide independent technical expertise and combat misinformation in emergent situations.

Company visibility and employee benefits

Being a [Trustees of Nuclear](#) means your organization has “persistent visibility” across the ANS platform, including website, online events, and podcasts.

[Trustees of Nuclear](#) receive a number of ANS individual memberships for employees based on their [Trustees of Nuclear](#) membership level.

[Trustees of Nuclear](#) partners also receive all ANS organizational member benefits – including discounts on Meeting registration and exhibit booths, ANS Career Finder job postings, and ANS Store purchases.

Partnership Levels

ANS offers tiered [Trustees of Nuclear](#) membership levels for utilities and suppliers.

For additional information, please contact:

Daryl Rizzo

ANS Director of Development
